Harmon's Fine Oriental Poppies

These vivid colored flowers are becoming more popular every year. We offer new varieties that add dash and exotic beauty to your garden. Flowers are very large on tall stiff stems. Colors range from pure white through many shades of orange, pink and red to wine-purple.

Consider their ease of culture, dependability for producing fine, large flowers, their hardiness and ability to thrive in almost all soils. They give large dividends for the little effort and time required to care for them.

These varieties have been tested and found very satisfactory. Strong growing, hardy and very desirable.

THE PLANTS WE SELL ARE GROWN FROM ROOT DIVISIONS

All are two-year-old field grown plants. They generally bloom the first year after planting and are very much superior to common seedlings usually sold at a cheap price. We guarantee them to be true to name.

Complete cultural directions and special starting fertilizer are sent with each order. Poppies like a well drained soil either clay or black loam and they like plenty of well rotted manure, leaf mold and bone meal. Cow or sheep manures are excellent.

BARR'S WHITE — Large flowers on strong tall stems. Velvety sheen of pure white. Purple or black at extreme base of petals. 75c ea.

BEAUTY OF LIVERMORE — Early. Tall growing 3 ft., large flowers of rich ox-blood red. 50c

PEONIES

This fine flower is very popular and their wonderful large flowers and brilliant colors are a great addition to the late May and June Gardens.

Perfectly hardy, easy to grow and once established will continue to produce their magnificent flowers year after year. Peonies like sunshine and a soil well enriched with rotted manures and bone meal. Plant four feet apart. Planting instructions included with

each shipment.

Peonies will often bloom the first year but the first bloom is seldom up to standard in color or size. The second year will be much better.
